DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, 7-12, 15, 17-19, 21, 24, and 29-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Toshio et al (JP 60-042411 in view of its English language abstract).

Toshio et al disclose a fluorine-containing polymer comprised of at least two monmeric units, and I and II appear to meet the instant claim limitations. The resultant polymer may be employed in a resist composition.

Claim Rejections - 35 USC § 103

3. Claims 4, 6, 13, 14, 16, 20, and 25-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zampini et al (WO 02/21216) in view of Toshio et al.

Zampini et al disclose a photoresist composition comprising monomers having electronegative groups. The composition may comprise fluorine-containing monomers such as (meth)acrylates and vinyl ethers along with monomers having the structures seen on pages 12, 13, 15, 23, and 24.

Toshio et al has been discussed above.

It would have been obvious to one of ordinary skill in the art to prepare the material of Zampini et al choosing to employ the known monomers of Toshio et al as the fluorine-containing

methacrylate/ vinyl ether monomers with reasonable expectation of achieving a material which may form a pattern having high resolution.
